

View PDFs with pleasure.

Built upon the Qt 4 framework and the Poppler library

Features

- PDF files are rendered by the Poppler library
- Only visible viewport quad is really rendered
- Pan, rotate and zoom into pages
- Display document information

Command-line syntax

```
pdf-viewer <file> [-windowed]
```

- `file`: Relative or absolute path to file to display.
- `-windowed`: If given, the app does not start as full screen
